

POWER BLANKET®

GAS CYLINDER HEATER BLANKET

FEATURES AND BENEFITS

- Increase performance and efficiency of gas cylinders
- Insulated full-wrap design
- Reduce Downtime and Increase Profitability
- Uniform Distribution of Heat
- Highly Efficient, Low Energy Consumptions
- UL/CSA/CE safety certifications
- Class 1 Division 2 Blankets

Cold weather can wreak havoc on gas cylinders. When the temperature drops, it's very difficult to maintain optimal pressure in a gas cylinder.

These blankets help to prevent the gas from stratifying, this in turn makes your gas standard stable. Powerblanket® offers a variety of gas cylinder heaters for controlling temperatures of propane, butane, nitrogen, oxygen and other compressed gases. Powerblanket® gas cylinder heaters provide a uniform barrier of heat across the entire cylinder. Our superior heating solution reduces costs by optimizing container temperatures and increasing cylinder efficiency.
